ELMWOOD ARTIFICIAL INTELLIGENCE POLICY

For purposes of this policy, artificial intelligence (“AI”) refers to technology that imitates human intelligence for problem solving and learning. Students who use AI must do so ethically and responsibly to enhance their learning in ways that do not compromise instructional objectives or academic integrity. The following principles shall apply to the use of AI by students:

- While AI may be used to supplement, aid, and/or assist students in their academic work, it should not be used as a substitute for a student’s own critical thinking, analysis, and/or compositional creations, nor shall it be used in a way which otherwise undermines the instructional objectives of an assignment, as determined by the teacher.
- Teachers retain discretion to determine the extent to which AI use is appropriate in the completion of student work. Teachers may allow its use under certain conditions with prior approval, or allow its use for certain tasks but not others. In cases where AI is used, that fact should be documented and disclosed by the student in a manner consistent with the teacher’s expectations. Students who have any doubt whether their intended use of AI for a particular assignment would violate this Board Policy or the teacher’s expectations must consult with their teacher for guidance and clarification prior to completing the assignment.
- The use of AI in violation of this Board Policy or in violation of any restriction or limitations imposed by a teacher shall be considered an act of academic dishonesty, and may result in disciplinary action as outlined in the Elmwood student handbook. Students using AI are responsible for any violations of law, Board policy, classroom rules, or other regulations that may be violated through the use of such technology.
