

Children's Resource Center has been providing support to families in Wood County since 1976. We continue to be here to support your family through these uncertain and stressful times.

In order to follow the recommendations for social distancing to prevent the spread of coronavirus, CRC has moved to telehealth for the following services:

- Therapy services (both school-based and agency-based)
- Prevention/Early Childhood Services
- Home-based services
- Group services
- Psychiatric services

This means you will not be required to leave your home to continue to participate in services and receive support. We have secured programming to allow us to provide HIPAA compliant and secure Telehealth services. For families who don't have access to video technology (smartphone, tablet, computer with camera, etc.) we will do sessions by telephone.

Though we have reduced our staff footprint in the building, we continue to have staff available.

We continue to provide Crisis Services for any youth and family in Wood County.

Please call the agency at 419-352-7588 24 hours a day, 7 days a week to access the crisis therapist.

Our Residential Unit continues to be in full operation.

We have made adjustments to our visitation protocol in order to comply with guidance to prevent the spread of coronavirus. At this time, in-person visitation has been restricted for anyone from outside the facility. We have added the capacity to do visits both by video and telephone to maintain family contact and interaction between families and their child/teen. Youth have and will of course be able to continue to call you.

We are all in this together.

If you have a child or teenager who is experiencing any mental health difficulties please reach out to us.

We can help.
